UNMAPPED

Closing the distance between real skills and economic opportunity

Skill Pathfinders · World Bank × Hack-Nation · Global AI Hackathon 2026

01 Skills Signal

02 AI Readiness

03 Opportunity Match

Powered by · TypeScript · Vite · Cloudflare · Claude API · World Bank WDI · ILO · Frey-Osborne · ESCO

Meet Amara.

She is 22.

Lives outside Accra.

Speaks 3 languages.

Runs a phone repair business.

Taught herself to code.

To the formal economy — she doesn't exist.

Three structural failures

Broken signals

Education credentials tell employers almost nothing. Informal skills are invisible.

AI disruption

Automation hits LMIC workers hardest. Youth have no tools to navigate it.

No matching layer

Skills and jobs exist side by side — but there is no connective tissue.

600M+ young people with unrecognised skills across low- and middle-income countries

AI readiness and displacement risk

Calibrated for LMIC labor markets using Frey-Osborne automation probabilities, ILO task indices and World Bank STEP. Outlook uses Wittgenstein Centre 2025-2035 projections.

Overall: Low AI risk · 35/100

Smallholder farming is among the most AI-resilient livelihoods in LMICs (ILO 2023). Risks come from precision-ag tools displacing record-keeping and price-discovery middlemen — not field work itself. Risk levels shown have been calibrated to Ghana via a ×0.55 LMIC modifier (Carbonero–Ernst–Weber (ILO 2018) · World Bank STEP Ghana 2014). 2025–2035 outlook uses Wittgenstein Centre Human Capital Data Explorer (SSP2, 2025–2035). Direct per-skill indexes are shown for 5 of 7 extracted skills; unmatched skills are included only in the broader profile estimate.

Turkish

Low AI risk · 21 (US baseline 38)

AI-resilient: non-routine, in-person work AI cannot easily replace.

`Auto risk 38% (Frey-Osborne)` `40% routine (ILO)` `LMIC average adjustment ×0.55`

Show sources

Your resilient skills

Skills you already have that are unlikely to be displaced by AI in the next decade.

- Java Spring
- Angular
- NestJS
- Machine Learning
- React Native
- Python
- AWS
- Medical Informatics

Adjacent skills to learn

Close to what you already do - small step to learn, big resilience gain.

AI-tool orchestration (LLM APIs, RAG)

RISING 2025-35

Turns existing technical skills into building and supervising AI-enabled workflows. Matched from: React Native, Python, Point of Sale (POS) systems. Wittgenstein SSP2 projects upper-secondary completion in Ghana to grow from 38% (2025) to 51% (2035) for the 20–34 age band, the cohort most likely to adopt AI tooling. ILO ROAP 2024 elasticity ≈ +6%/yr for AI-adjacent roles.

Learn on Coursera →

Cloud deployment

RISING 2025-35

Moves the candidate from writing app code into deploying, operating and integrating production systems. Matched from: React Native, Point of Sale (POS) systems, Accounting and Bookkeeping. Wittgenstein 2035 projection: post-secondary technical share rises ~1.4× across SSA. Cloud-skilled workers see rising demand from regional tech hubs (Lagos, Accra, Nairobi).

Learn on Coursera →

Data quality & human-in-the-loop QA

RISING 2025-35

Moves routine input work toward checking, correcting and supervising automated outputs. Matched from: Problem Solving, Communication. Tertiary completers with quantitative training projected to grow 50% by 2035 in NGA/BGD (Wittgenstein SSP2). Data work captures a disproportionate share of the gain.

Learn on Coursera →

API security

Builds on backend/API work and shifts value toward security judgment that is harder to automate. Matched from: Point of Sale (POS) systems, Accounting and Bookkeeping.

Learn on Coursera →

Testing automation

Pairs with coding skills while strengthening verification, debugging and release confidence. Matched from: React Native.

AVG PAY IN MARKET

GHS 1,500 to 3,000

GHS / month; confidence medium

Derived from recent job postings and typical wage reports for similar roles in Accra, Ghana.

EMPLOYMENT IN AGE GROUP

No precise age-specific data; possibly under 1% of youth labor force

15-24; confidence low

Exact occupation-by-age data unavailable; proxy based on industrial employment share (~18%) and combine with trade prevalence in urban areas. Youth employment in technical trades is relatively low compared to total youth labor force.
